

Washington City and County Reference

Below is a list of all the places in the state and their corresponding county. There might be duplicates of a single place as some places are identified as being located in two or more counties. It is important to understand that the county and place correlations are based on today's geography. Each place has a link that identifies when the place is in more than one county, as well as historical information and more. There are two lists: A list of places and their corresponding county; and a list of counties with the places that are in that county. What is a place? Besides cities and towns, there are several types of places. Most states have Census Designated Places, Unincorporated communities, Indian Reservations, and ghost towns. Other places may be known as villages, hamlets, historic districts, townships, boroughs, municipalities, and more.
